

**February 13, 2015**

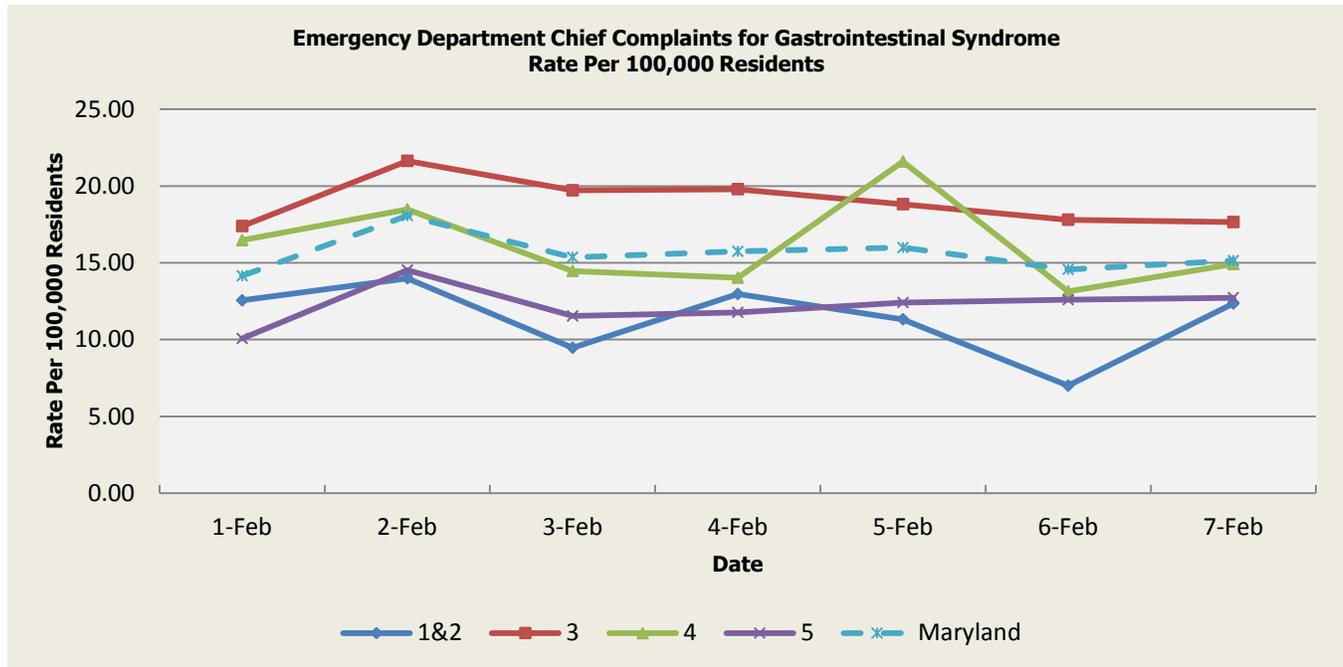

**Public Health Preparedness and Situational Awareness Report: # 2015:05  
Reporting for the week ending 02/07/15 (MMWR Week #5)**

**CURRENT HOMELAND SECURITY THREAT LEVELS**  
**National: No Active Alerts**  
**Maryland: Level Four (MEMA status)**

**SYNDROMIC SURVEILLANCE REPORTS**

**ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics):**

Graphical representation is provided for all syndromes (excluding the "Other" category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census.

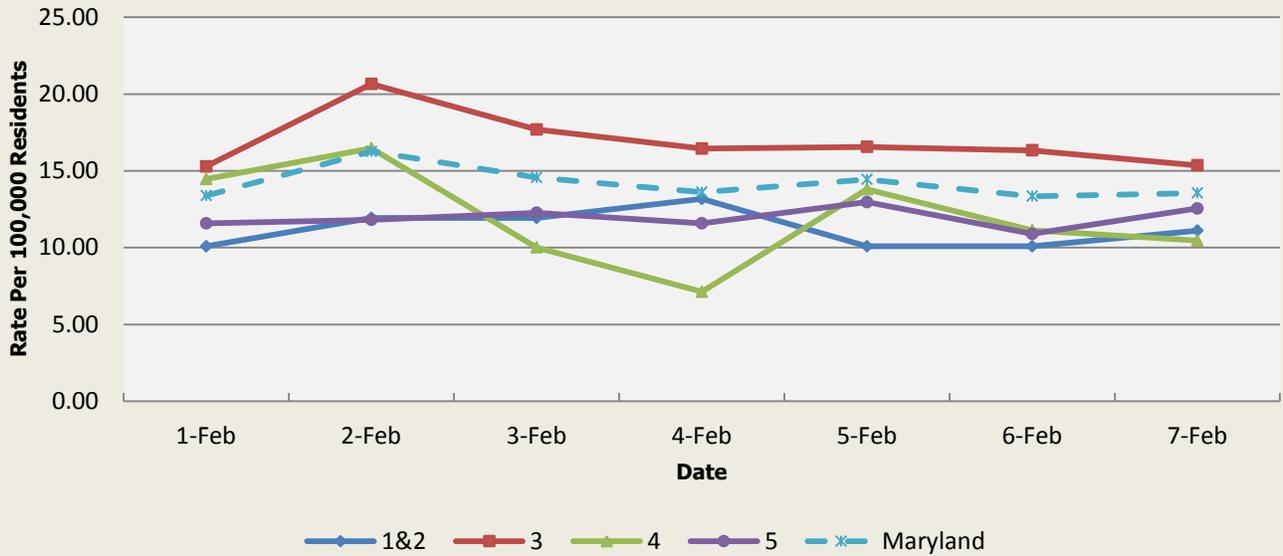

There were 8 gastrointestinal illness outbreaks reported this week: 4 outbreaks of gastroenteritis in nursing homes (Regions 3, 4, 5), 3 outbreaks of gastroenteritis in assisted living facilities (Region 3), and 1 outbreak of gastroenteritis/foodborne associated with a restaurant (Region 3).

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	13.17	14.27	15.32	10.39	12.80
Median Rate*	13.17	14.20	14.69	10.30	12.73

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Respiratory Syndrome  
Rate Per 100,000 Residents**

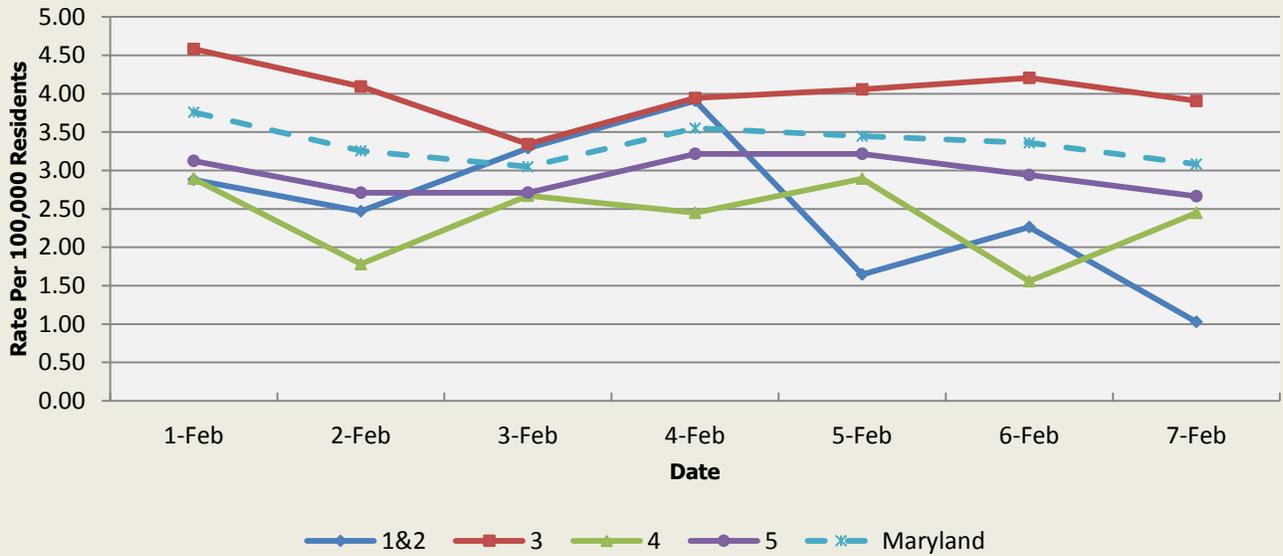

There were 5 respiratory illness outbreaks reported this week: 2 outbreaks of influenza in nursing homes (Regions 1&2, 4), 1 outbreak of influenza in a rehabilitation facility (Region 5), 1 outbreak of influenza/pneumonia in a nursing home (Region 3), and 1 outbreak of pertussis associated with a private home and school (Regions 5 and out of state).

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.14	13.38	13.76	9.85	11.97
Median Rate*	11.73	12.99	13.36	9.56	11.67

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Fever Syndrome  
Rate Per 100,000 Residents**

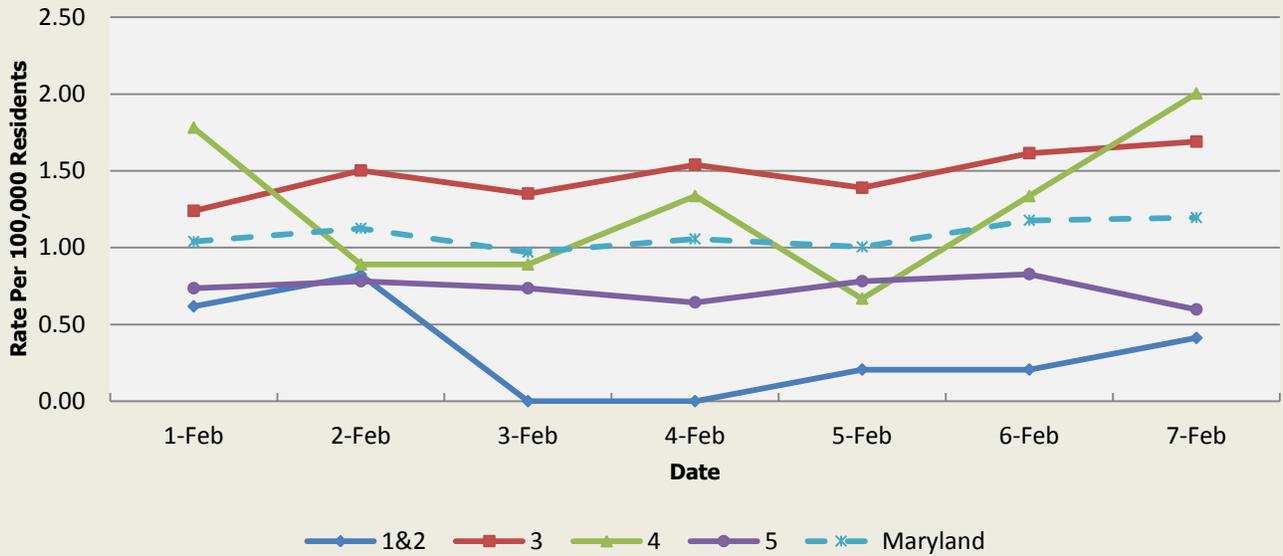

There were no fever outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.24	3.64	3.89	3.15	3.44
Median Rate*	3.09	3.49	3.78	3.03	3.31

Per 100,000 Residents

**Emergency Department Chief Complaints for Localized Lesion Syndrome  
Rate Per 100,000 Residents**

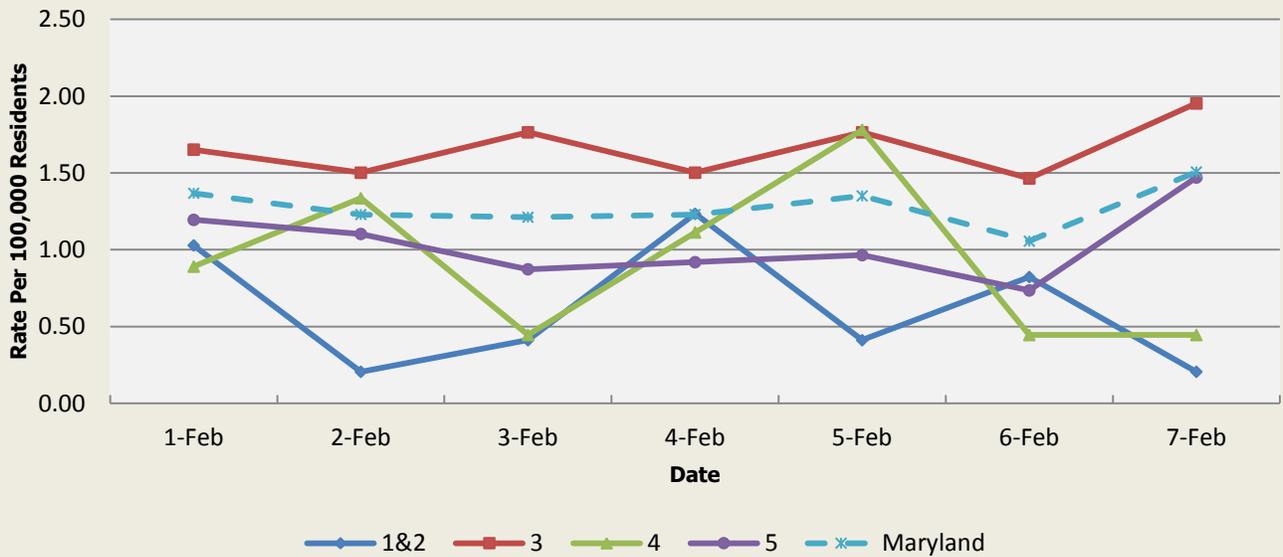

There were no localized lesion outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.17	1.97	2.06	1.04	1.56
Median Rate*	1.03	1.92	2.00	1.01	1.51

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Rash Syndrome  
Rate Per 100,000 Residents**

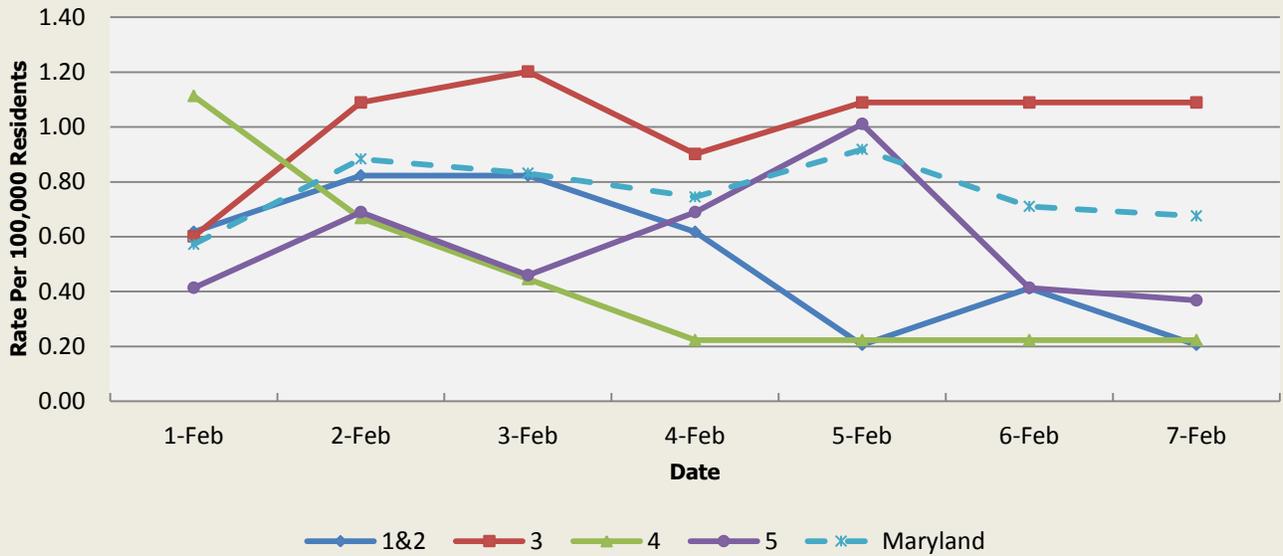

There were no rash outbreaks reported this week.

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.40	1.75	1.78	1.09	1.47
Median Rate*	1.23	1.69	1.78	1.06	1.42

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Neurological Syndrome  
Rate Per 100,000 Residents**

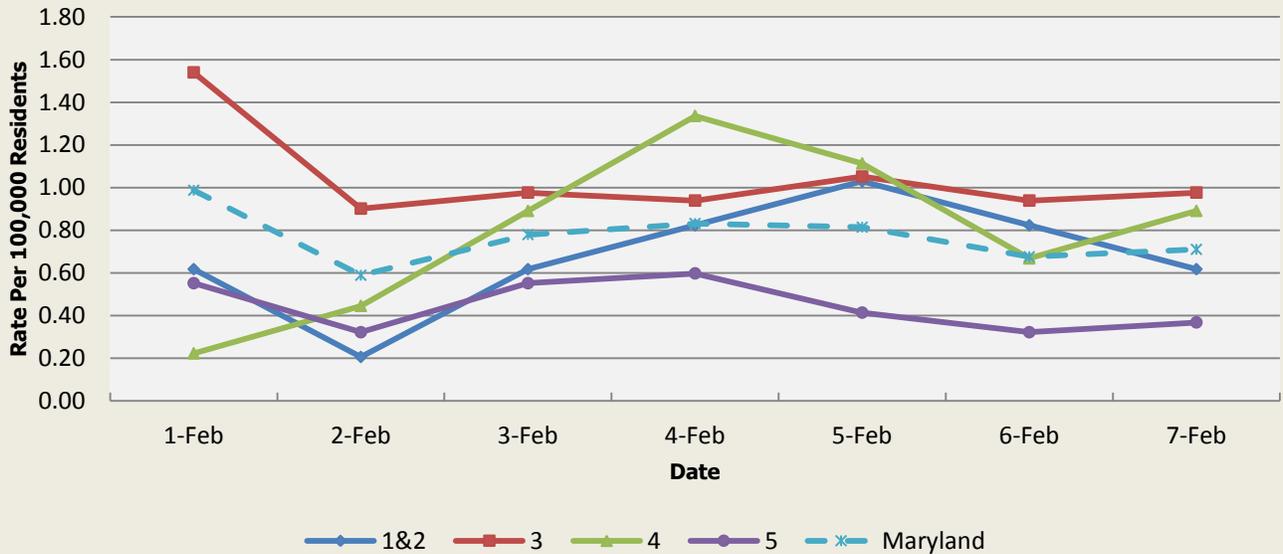

There were no neurological outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.61	0.62	0.59	0.43	0.55
Median Rate*	0.62	0.60	0.45	0.41	0.54

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Severe Illness or Death Syndrome  
Rate Per 100,000 Residents**

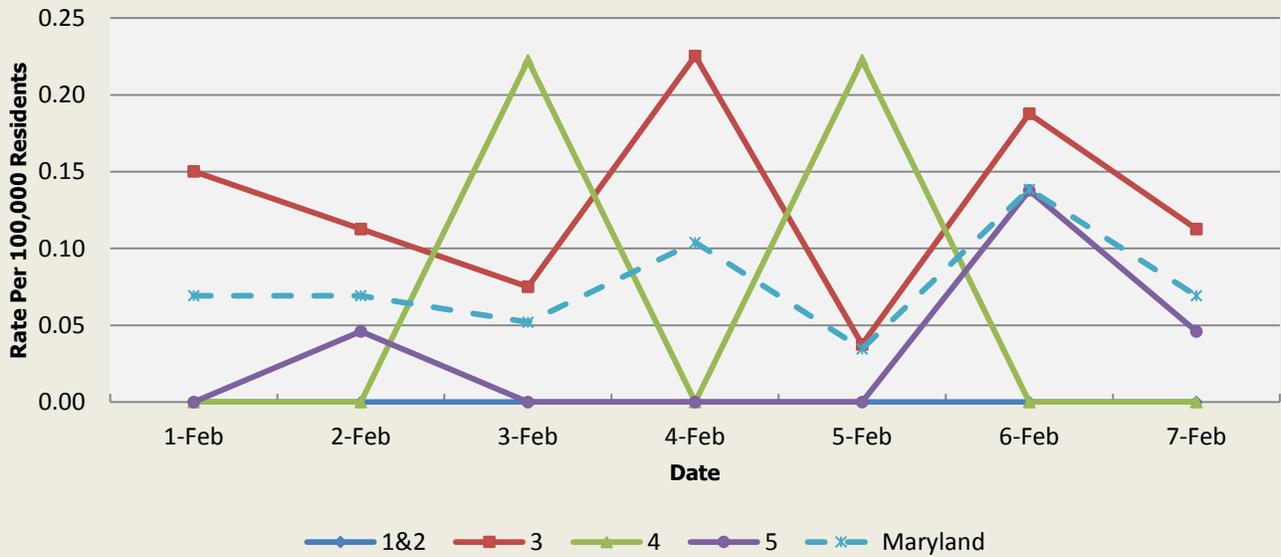

There were no severe illness or death outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.80	0.95	0.89	0.42	0.73
Median Rate*	0.82	0.94	0.89	0.41	0.73

\* Per 100,000 Residents

**SYNDROMES RELATED TO CATEGORY A AGENTS**

**Emergency Department Chief Complaints for Botulism-like Syndrome  
Rate Per 100,000 Residents**

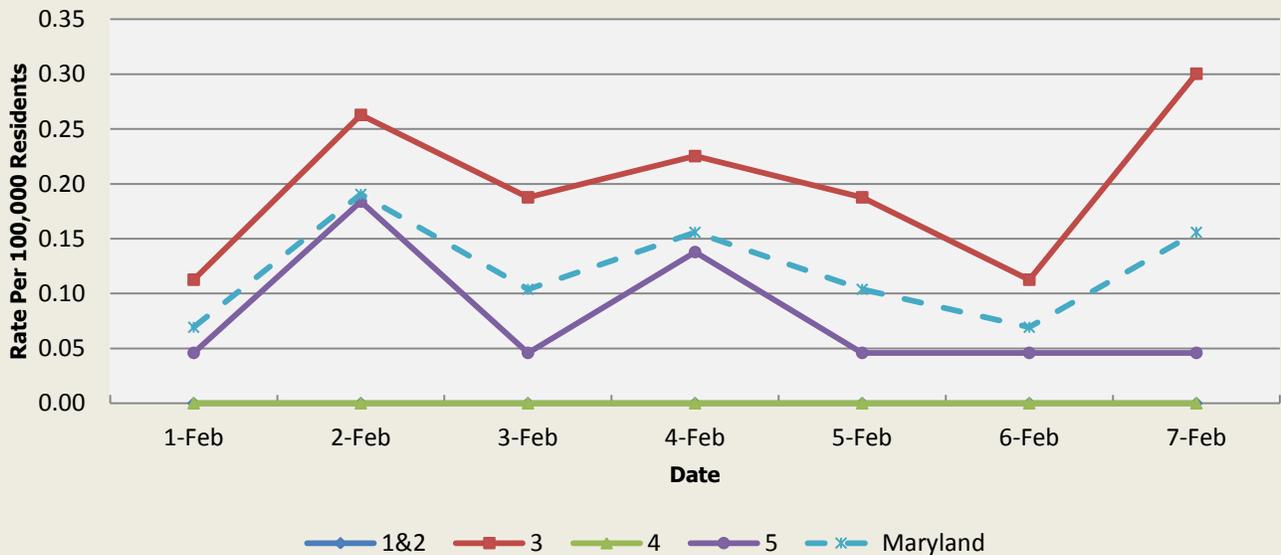

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 2/1 (Region 3), 2/3 (Region 4), 2/4 (Region 3), 2/5 (Region 4), and 2/6 (Region 3) These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.06	0.04	0.04	0.03	0.04
Median Rate*	0.00	0.04	0.00	0.00	0.03

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Hemorrhagic Illness Syndrome  
Rate Per 100,000 Residents**

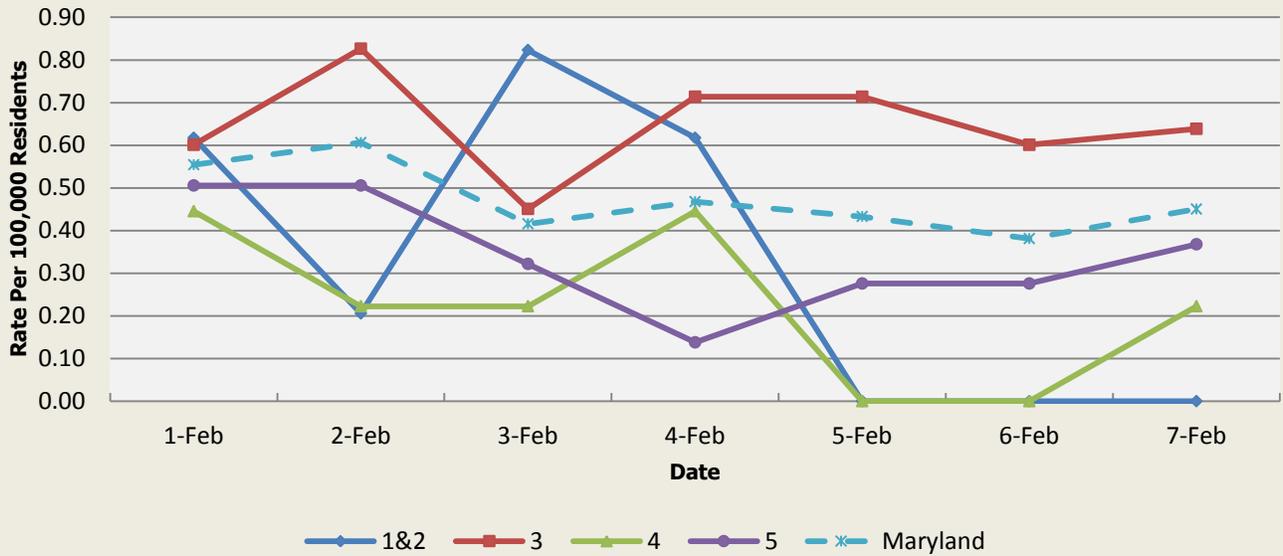

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 2/2 (Regions 3, 5), 2/4 (Regions 3, 5), and 2/7 (Region 3). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.03	0.04	0.03	0.03	0.03
Median Rate*	0.00	0.04	0.00	0.00	0.03

\* Per 100,000 Residents

**Emergency Department Chief Complaints for Lymphadenitis Syndrome  
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 2/1 (Region 5), 2/2 (Region 3, 5), 2/3 (Regions 1&2), 2/4 (Region 3), and 2/5 (Region 3). These increases are not known to be associated with any outbreaks.

Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.33	0.34	0.35	0.24	0.30
Median Rate*	0.21	0.30	0.22	0.23	0.29

\* Per 100,000 Residents

**MARYLAND REPORTABLE DISEASE SURVEILLANCE**

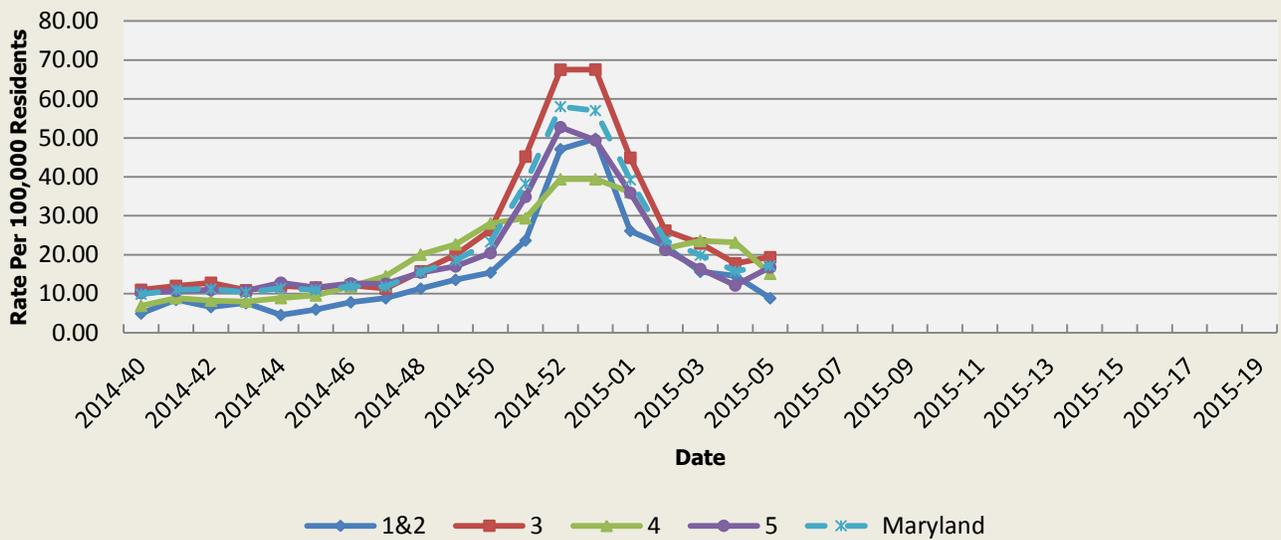

Condition	Counts of Reported Cases†					
	February			Cumulative (Year to Date)**		
	2015	Mean*	Median*	2015	Mean*	Median*
<b>Vaccine-Preventable Diseases</b>						
Aseptic meningitis	4	24.2	21	27	60	64

† Counts are subject to change      \*Timeframe of 2009-2014      \*\*Includes January through present

**SYNDROMIC INFLUENZA SURVEILLANCE**

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 22 (October through May). Seasonal influenza activity for Week 5 was: Widespread Activity with Minimal Intensity.

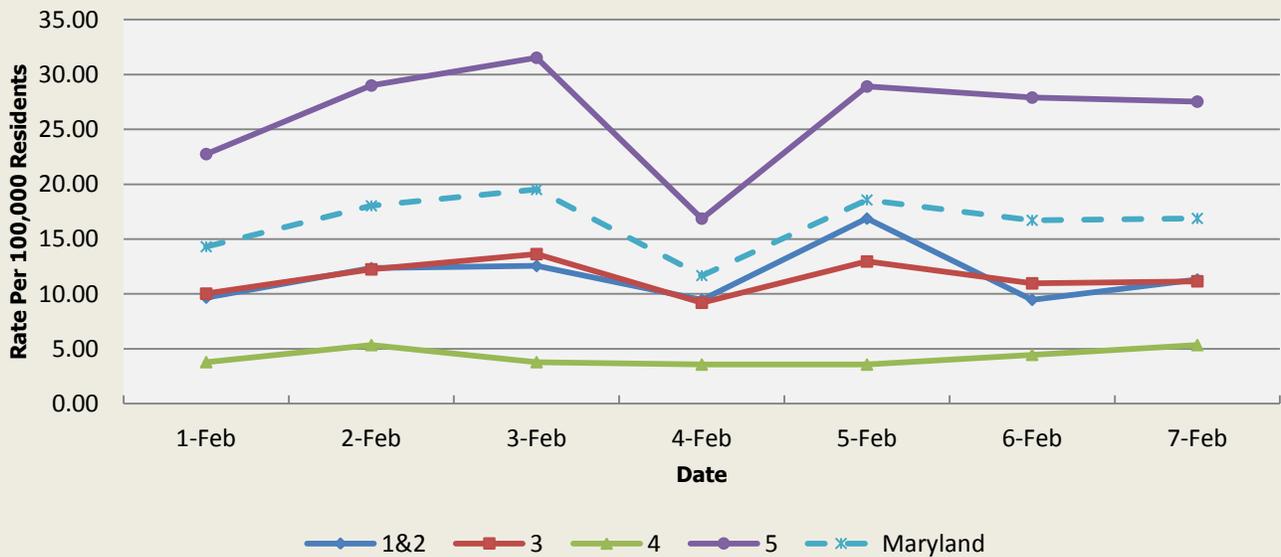

**Emergency Department Chief Complaints for Influenza-like Illness  
Rate Per 100,000 Residents**

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	9.86	10.58	11.04	9.90	10.30
Median Rate*	8.02	8.26	8.90	7.40	8.00

\* Per 100,000 Residents

**Over-the-Counter Medication Sales Related to Influenza  
Rate Per 100,000 Residents**

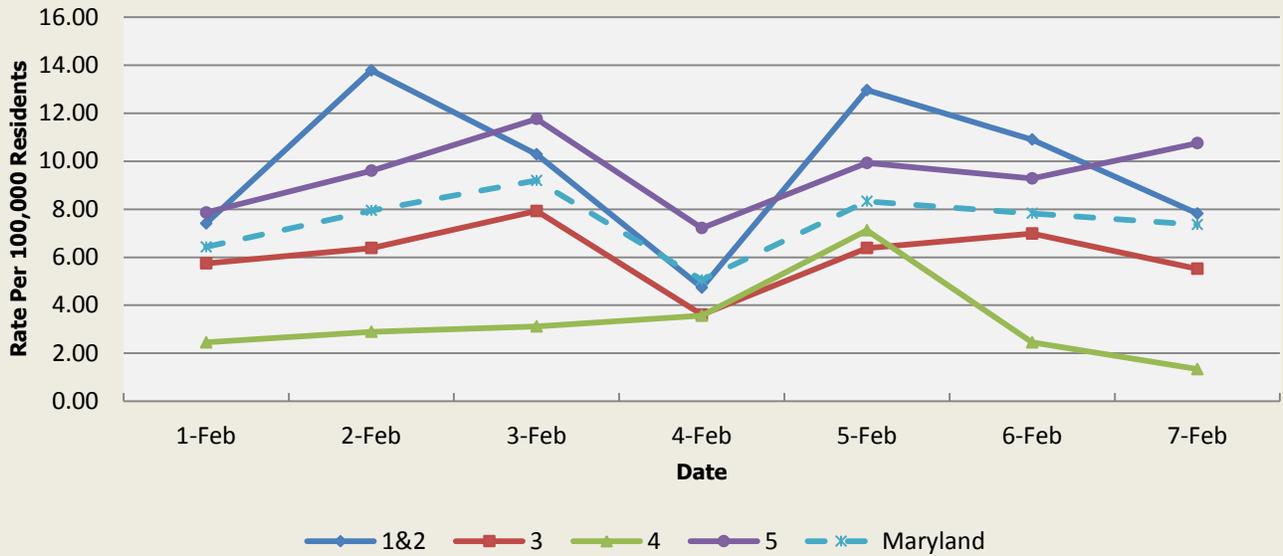

OTC Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.58	6.35	3.06	14.83	9.22
Median Rate*	4.32	5.18	2.67	12.04	7.42

\* Per 100,000 Residents

There was an appreciable increase above baseline in the rate of OTC flu medication sales on 2/2 (Regions 1&2, 5), 2/3 (Regions 1&2, 3, 5), and 2/5 (Regions 1&2, 5)

**Over-the-Counter Thermometer Sales  
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of OTC thermometer sales on 2/2 (Regions 1&2) and 2/5 (Regions 1&2, 4).

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.84	4.93	3.43	8.42	6.20
Median Rate*	5.14	4.54	3.12	7.77	5.74

\* Per 100,000 Residents

## **PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS**

**WHO update:** The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. As yet, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

**Alert phase:** This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national and global levels, are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of January 6, 2015, the WHO-confirmed global total (2003-2015) of human cases of H5N1 avian influenza virus infection stands at 694, of which 402 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 58%.

**H5N1 (EGYPT):** 08 Feb 2015 The health ministry said on [Sun 8 Feb 2015] that 4 new people were identified as positive with bird flu [avian influenza A(H5N1)] in Egypt, while 3 others recovered. Read more: <http://www.promedmail.org/direct.php?id=20150210.3155566>

**H7N9 (CHINA):** 08 Feb 2015 The number of H7N9 human cases in south China's Guangdong Province has reached 42 this year [2015] with 3 more cases reported, local health authorities said on [Sun 8 Feb 2015]. Read more: <http://www.promedmail.org/direct.php?id=20150210.3156635>

**H5N6 (CHINA):** 09 Feb 2015 The National Health and Family Planning Commission in China has reported a confirmed human case of avian influenza A(H5N6) today [9 Feb 2015]. Read more: <http://www.promedmail.org/direct.php?id=20150212.3158362>

### **NATIONAL DISEASE REPORTS**

**MELIOIDOSIS (LOUISIANA):** 09 Feb 15 A federal investigator who visited the Tulane National Primate Research Center (TNPRC) in late January 2015 as part of the response to the November 2014 Burkholderia pseudomallei infections of 2 macaques may have been exposed to the bacterium. Read more: <http://www.promedmail.org/direct.php?id=20150210.3157436>

### **INTERNATIONAL DISEASE REPORTS**

**NIPAH ENCEPHALITIS (BANGLADESH):** 02 Feb 2015 Last week, 2 people died of Nipah virus at Manda upazila in Naogaon, said the Institute of Epidemiology, Disease Control and Research today [2 Feb 2015]. Read more: <http://www.promedmail.org/direct.php?id=20150204.3143251>

**ANTHRAX (INDIA):** 08 Feb 2015 A medical team from District Headquarters Hospital on Saturday [7 Feb 2015] reached Patenda village under Lamataput block to examine 42 villagers who are suspected to be affected by anthrax. Read more: <http://www.promedmail.org/direct.php?id=20150209.3154679>

**TULAREMIA (KOSOVO):** 10 Feb 2015 Kosovo Institute for Public Health declared today, 10 Feb 2015, an epidemic of tularemia in the province, BETA news agency reported. Read more: <http://www.promedmail.org/direct.php?id=20150212.3161852>

**EBOLA (MULTI-COUNTRY):** 11 Feb 2015 WHO Ebola Response Roadmap Situation Report. Read more: <http://www.promedmail.org/direct.php?id=20150211.3158048> (click through to who.int link)

**PLAGUE (MADAGASCAR):** 11 Feb 2015 An outbreak of plague in Madagascar has slowed but 71 people among the 263 known to have caught the disease since September 2014 have died, the World Health Organization (WHO) said on Wed 11 Feb 2015. Read more:

**NOTE:** This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
