

February 19, 2016

**Public Health Preparedness and Situational Awareness Report: #2016:06
Reporting for the week ending 2/13/16 (MMWR Week #6)**

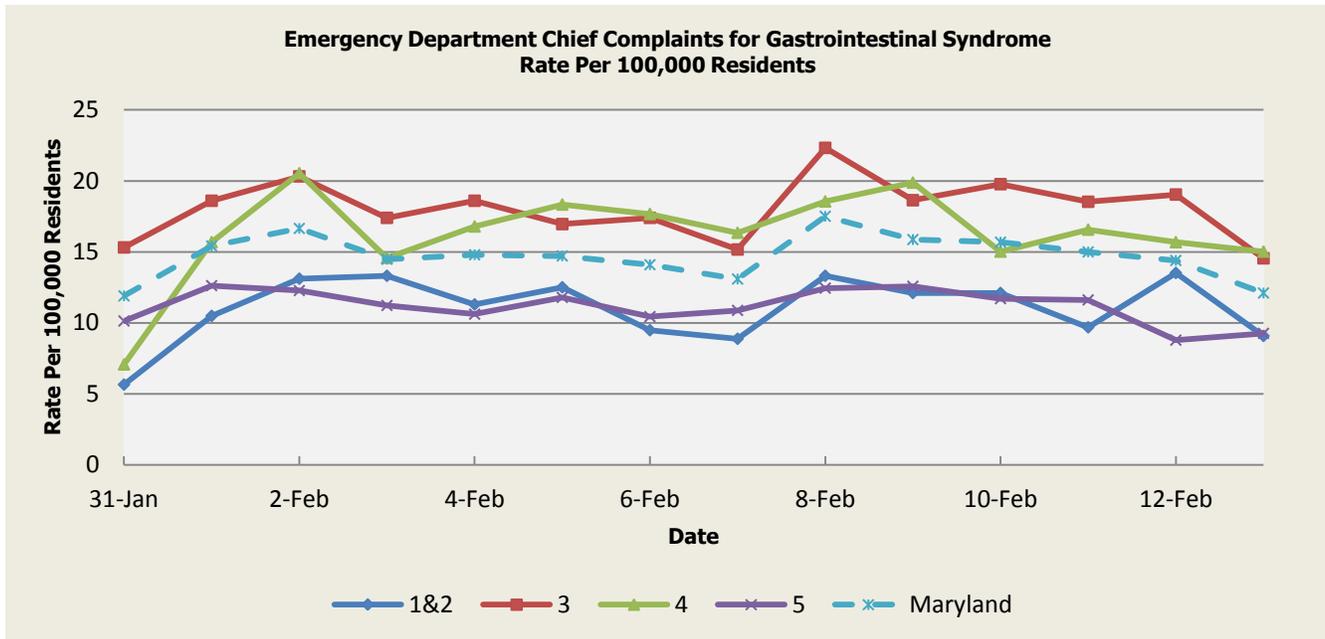

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts
Maryland: Level Four (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics):

Graphical representation is provided for all syndromes (excluding the "Other" category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census.

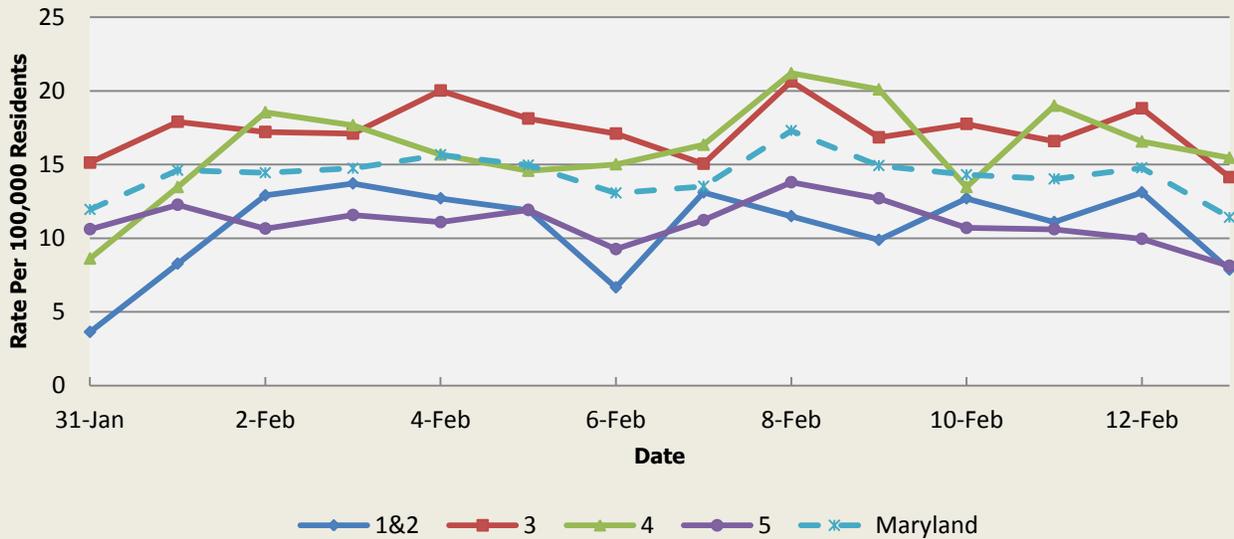

There were four gastrointestinal illness outbreaks reported this week: 4 outbreaks of gastroenteritis associated with nursing homes (Regions 1&2,3,4,5).

Health Region	Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present				
	1&2	3	4	5	Maryland
Mean Rate*	12.91	14.67	15.36	10.25	12.88
Median Rate*	12.70	14.36	14.80	10.13	12.67

* Per 100,000 Residents

**Emergency Department Chief Complaints for Respiratory Syndrome
Rate Per 100,000 Residents**

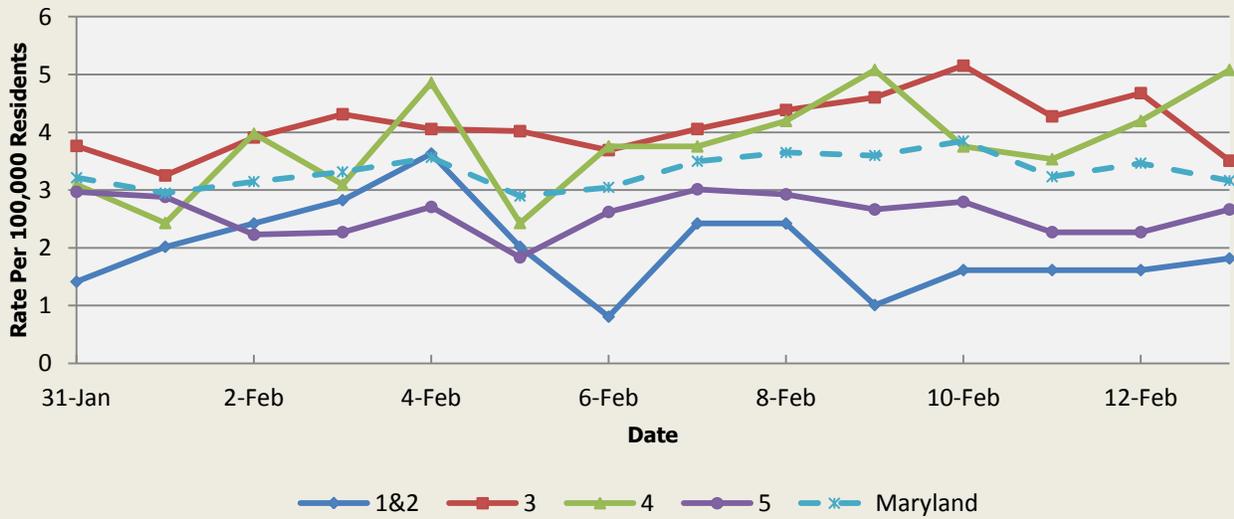

There were two respiratory outbreaks reported this week. 1 outbreak of pneumonia associated with a nursing home (Region 3). 1 outbreak of pneumonia associated with a daycare center (Regions 1&2).

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	11.95	13.84	13.94	9.83	12.16
Median Rate*	11.49	13.19	13.47	9.43	11.66

* Per 100,000 Residents

**Emergency Department Chief Complaints for Fever Syndrome
Rate Per 100,000 Residents**

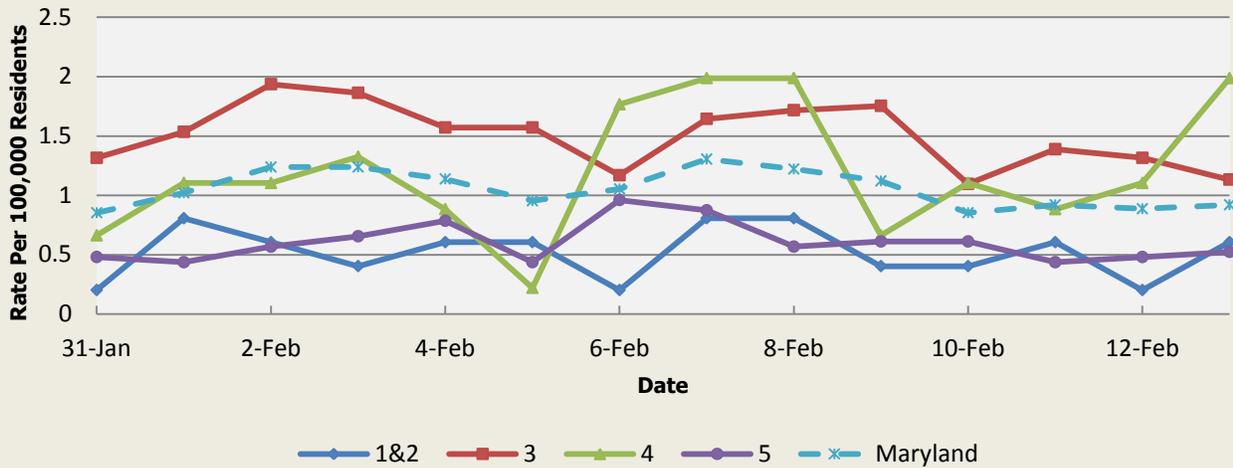

There were no fever outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.09	3.73	3.89	3.06	3.44
Median Rate*	3.02	3.58	3.75	2.97	3.31

Per 100,000 Residents

**Emergency Department Chief Complaints for Localized Lesion Syndrome
Rate Per 100,000 Residents**

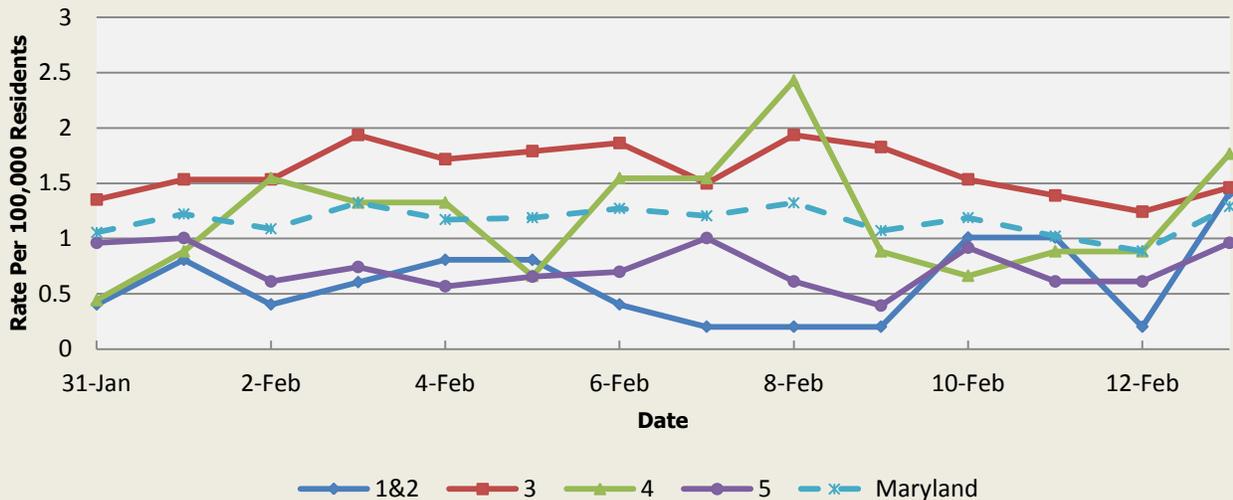

There were no localized lesion outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.08	1.92	2.04	0.99	1.51
Median Rate*	1.01	1.86	1.99	0.96	1.46

* Per 100,000 Residents

**Emergency Department Chief Complaints for Rash Syndrome
Rate Per 100,000 Residents**

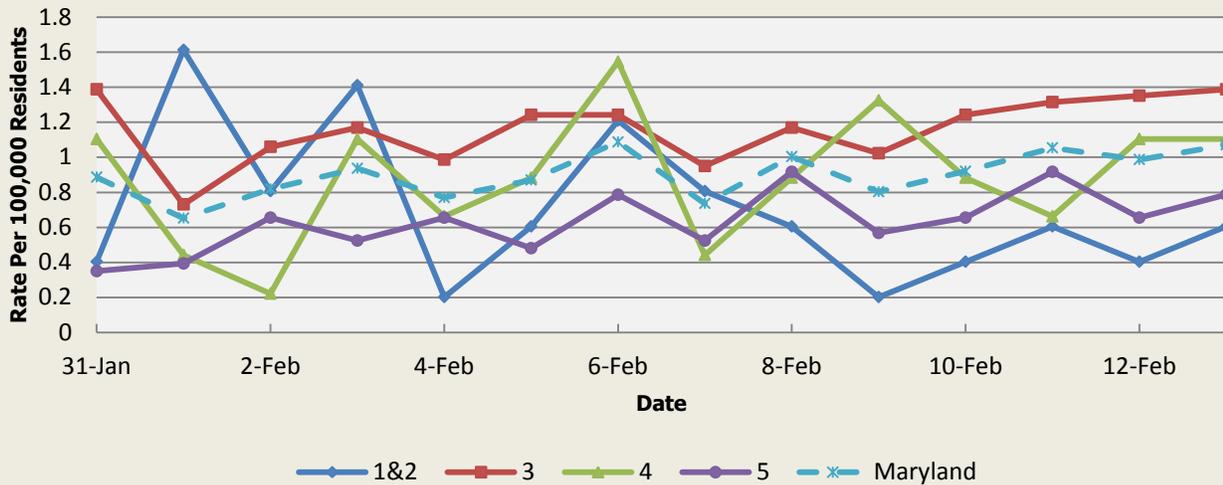

There were two rash outbreaks reported this week. 2 outbreaks of hand, foot, and mouth disease associated with daycare centers (Regions 1&2,3).

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.31	1.75	1.76	1.05	1.44
Median Rate*	1.21	1.68	1.77	1.00	1.39

* Per 100,000 Residents

**Emergency Department Chief Complaints for Neurological Syndrome
Rate Per 100,000 Residents**

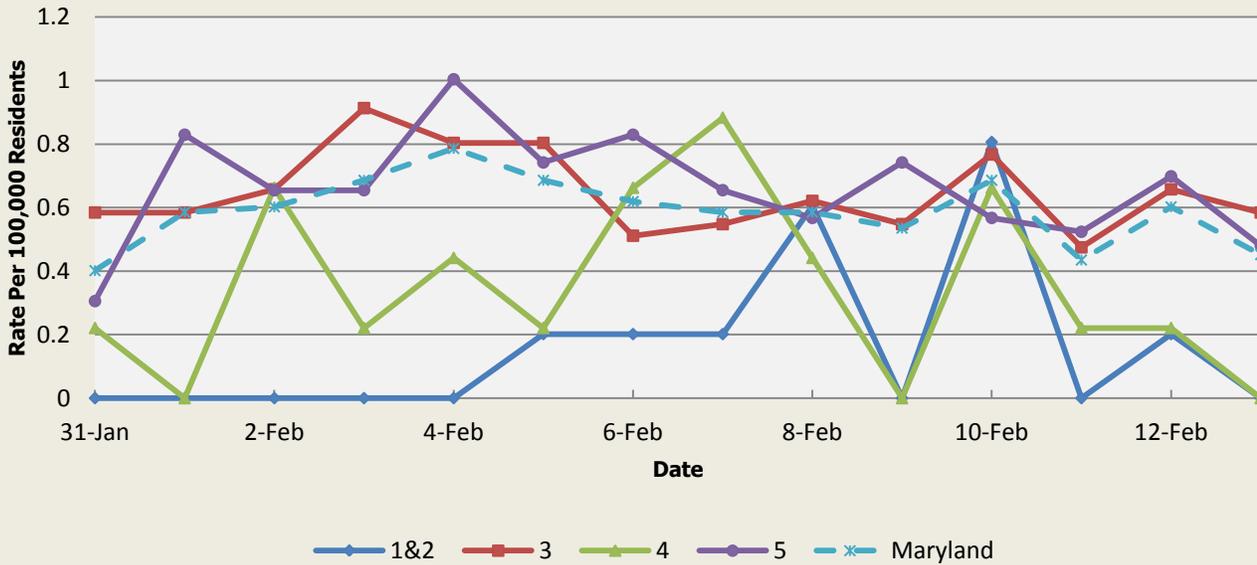

There were no neurological syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.62	0.71	0.64	0.47	0.60
Median Rate*	0.60	0.66	0.66	0.44	0.55

* Per 100,000 Residents

**Emergency Department Chief Complaints for Severe Illness or Death Syndrome
Rate Per 100,000 Residents**

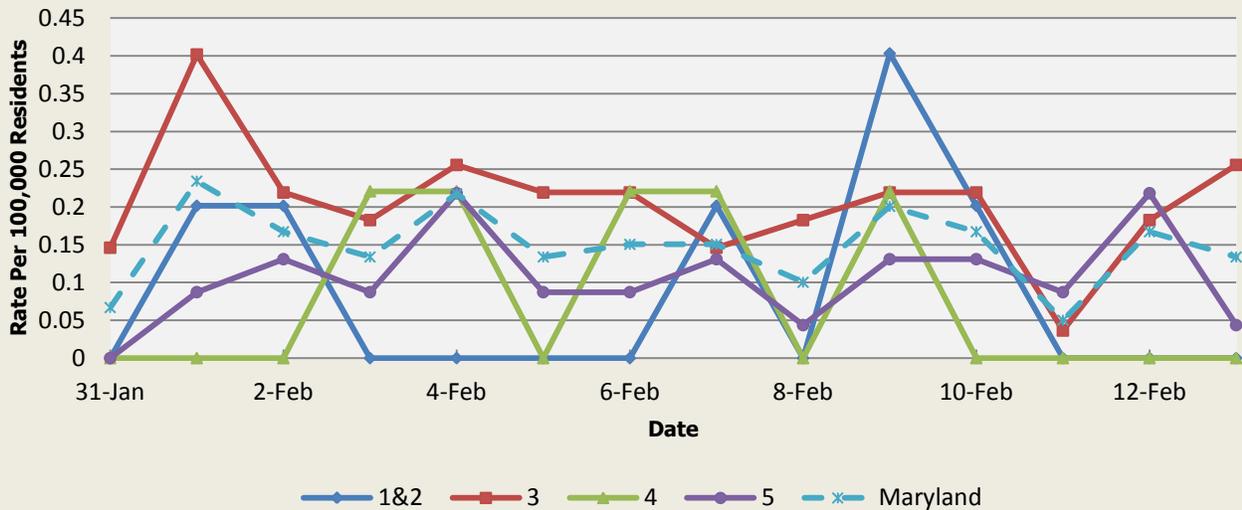

There were no severe illness or death outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.72	0.96	0.86	0.44	0.73
Median Rate*	0.60	0.95	0.88	0.44	0.72

* Per 100,000 Residents

SYNDROMES RELATED TO CATEGORY A AGENTS

**Emergency Department Chief Complaints for Botulism-like Syndrome
Rate Per 100,000 Residents**

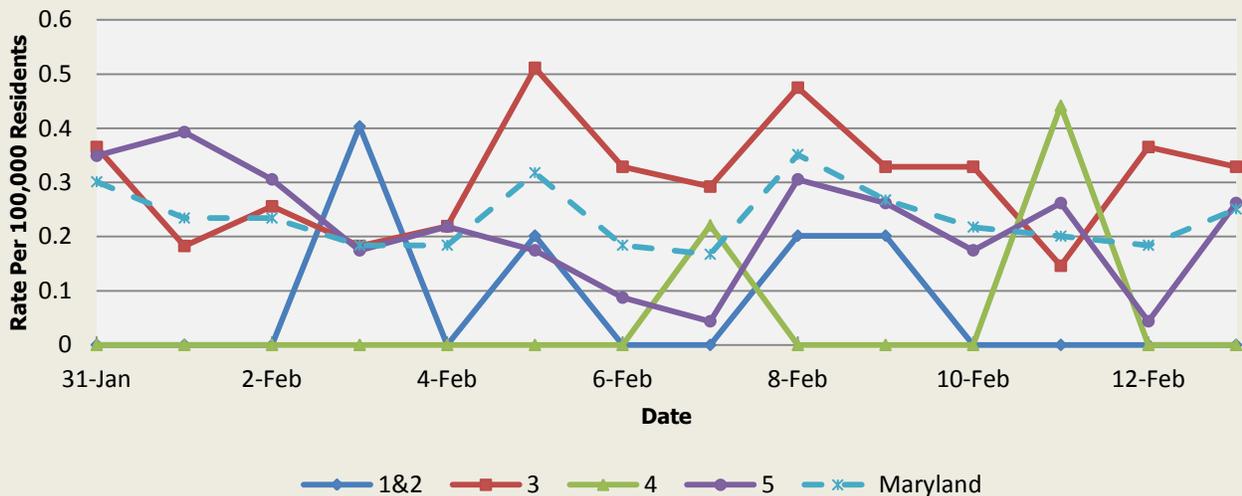

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 2/7 (Regions 1&2,3,4,5), 2/8 (Region 3), 2/9 (Regions 1&2,3,4,5), 2/10 (Regions 1&2,3,5), 2/12 (Regions 3,5) and 2/13 (Region 3). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.06	0.07	0.04	0.05	0.06
Median Rate*	0.00	0.04	0.00	0.04	0.05

* Per 100,000 Residents

**Emergency Department Chief Complaints for Hemorrhagic Illness Syndrome
Rate Per 100,000 Residents**

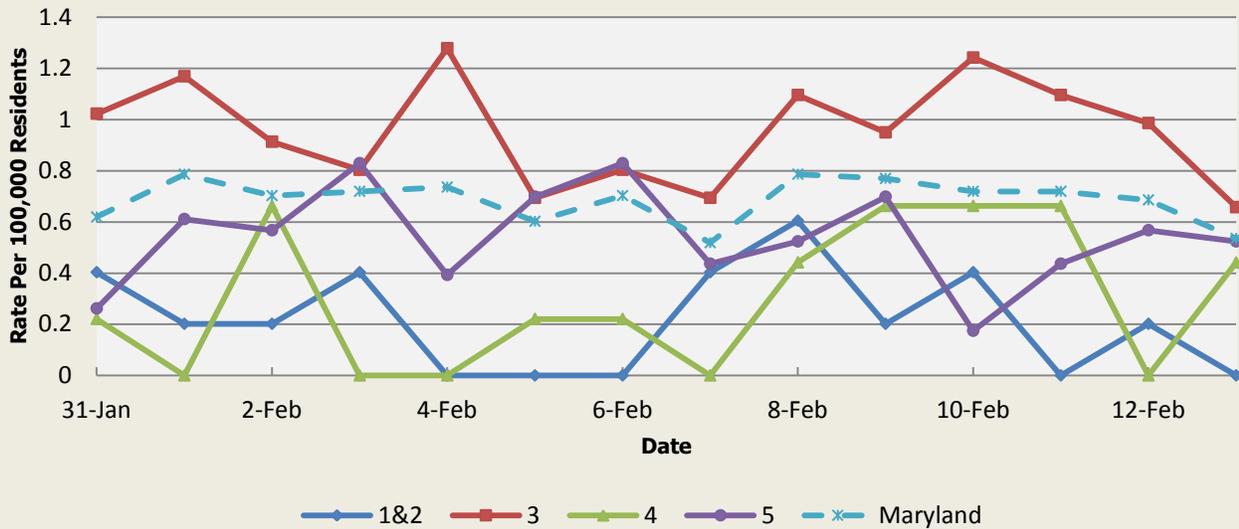

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 2/7 (Regions 3,4), 2/8 (Regions 1&2,3,5), 2/9 (Regions 1&2,3,5), 2/10 (Regions 3,5), 2/11 (Regions 4,5), 2/12 (Region 3), and 2/13 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.03	0.09	0.03	0.06	0.07
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Lymphadenitis Syndrome
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 2/8 (Region 3), 2/9 (Regions 3,5), 2/10 (Region 3), 2/11 (Region 3), and 2/12 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.31	0.44	0.34	0.28	0.36
Median Rate*	0.20	0.37	0.22	0.26	0.32

* Per 100,000 Residents

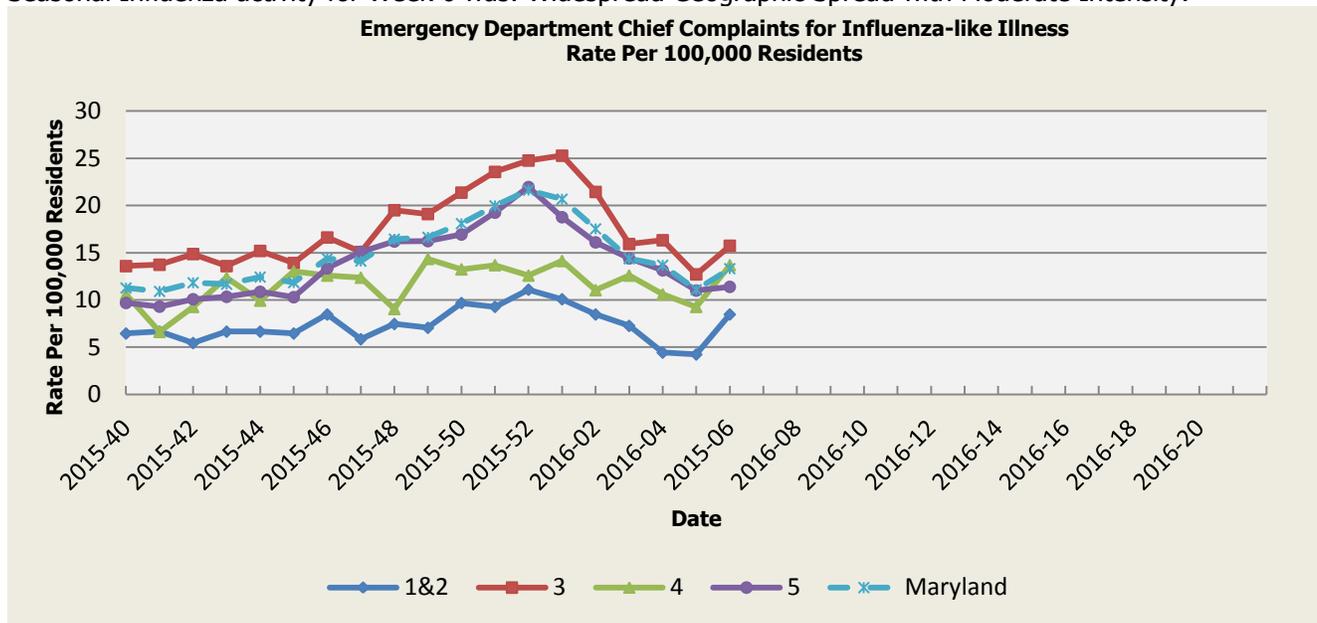

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Condition	Counts of Reported Cases†					
	February			Cumulative (Year to Date)**		
	2016	Mean*	Median*	2016	Mean*	Median*
Vaccine-Preventable Diseases						
Aseptic meningitis	6	11.4	10	25	43.6	41
Meningococcal disease	0	0	0	0	1.2	1
Measles	0	0	0	0	0	0
Mumps	0	1	0	0	1.4	0
Rubella	0	0	0	0	0	0
Pertussis	0	6.4	6	1	21.6	22
Foodborne Diseases						
Salmonellosis	8	19.6	19	37	66.2	65

† Counts are subject to change *Timeframe of 2009-2015 **Includes January through current month

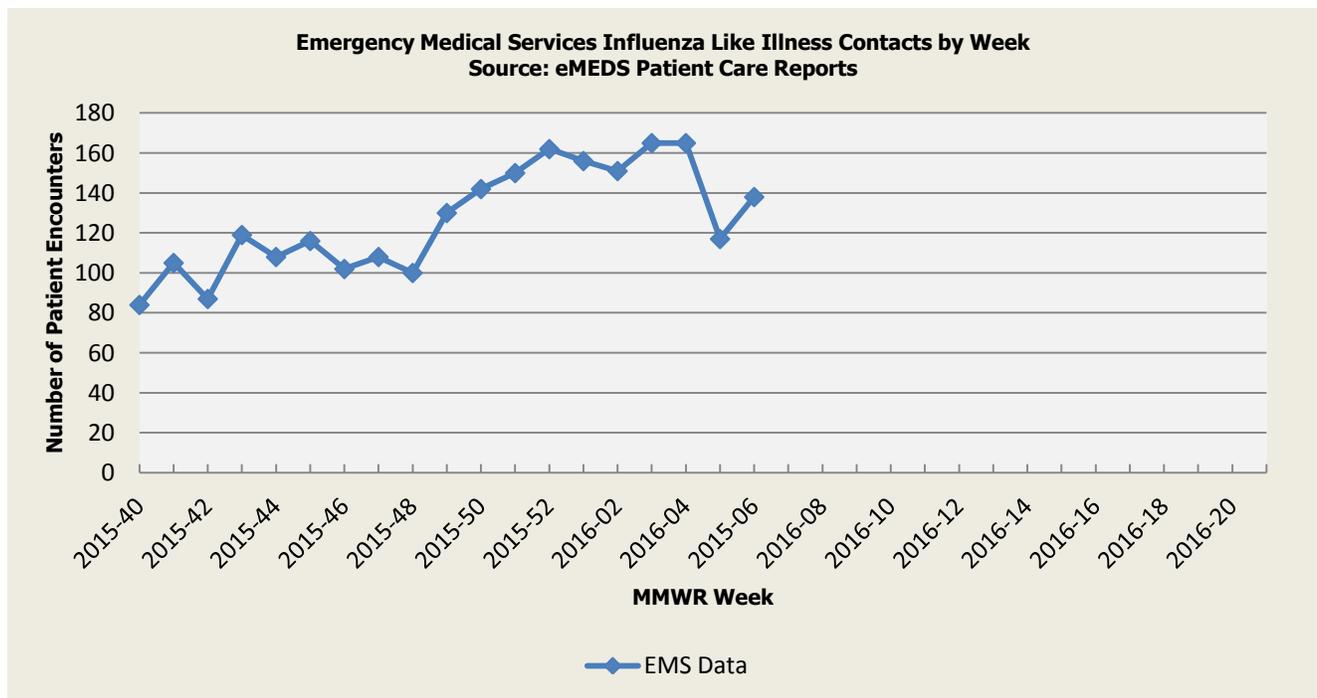

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October through May). Seasonal Influenza activity for Week 6 was: Widespread Geographic Spread with Moderate Intensity.

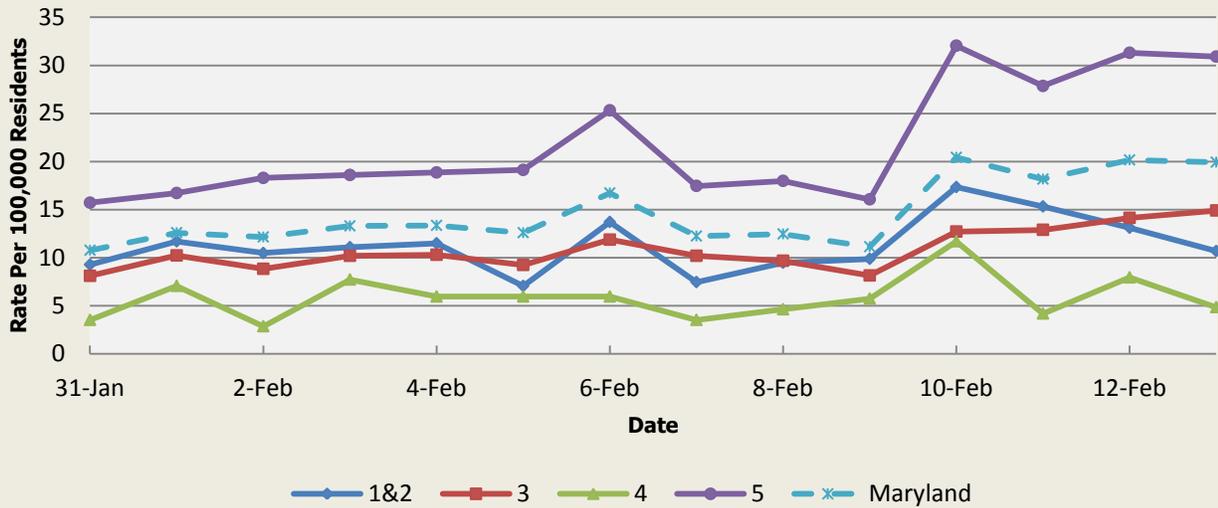

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	9.27	11.10	10.77	10.10	10.54
Median Rate*	7.66	8.77	8.83	7.81	8.47

* Per 100,000 Residents

Disclaimer on eMEDS flu related data: This data is based on EMS Pre-hospital care reports where the EMS provider has selected "flu like illness" as a primary or secondary impression of a patient's illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. This data is reported for trending purposes only.

**Over-the-Counter Medication Sales Related to Influenza
Rate Per 100,000 Residents**

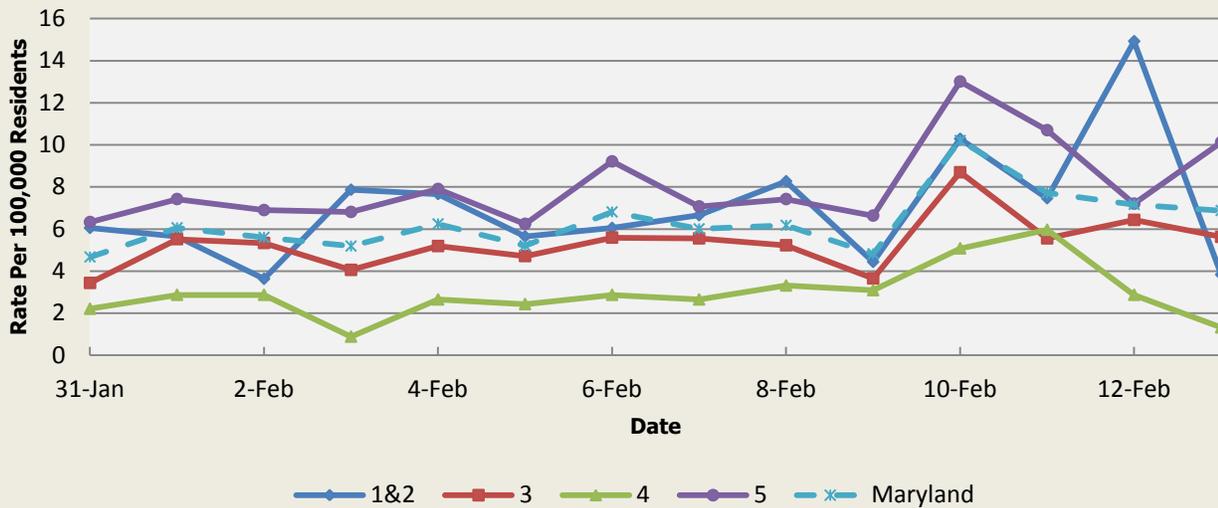

There was an appreciable increase above baseline in the rate of OTC flu medication sales on 2/10 (Regions 1&2,4,5), 2/11 (Regions 1&2,3), 2/12 (Regions 1&2,3,4,5) and 2/13 (Regions 3,5).

OTC Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.72	6.37	3.20	14.25	9.10
Median Rate*	4.44	5.26	2.65	11.53	7.40

* Per 100,000 Residents

**Over-the-Counter Thermometer Sales
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of OTC thermometer sales on 2/12 (Regions 1&2).

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.71	4.71	3.33	7.74	5.85
Median Rate*	5.04	4.35	2.87	7.12	5.37

* Per 100,000 Residents

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. As yet, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national and global levels, are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of January 20, 2016, the WHO-confirmed global total (2003-2015) of human cases of H5N1 avian influenza virus infection stands at 846, of which 449 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

Avian Influenza in Humans:

H7N9 (CHINA): 12 Feb 2016 Deadly H7N9 bird flu can, in certain situations, be transmitted person-to-person in hospitals, according to a new report from China. Read More: <http://www.promedmail.org/post/4014491>

There were no reports of human cases of avian influenza in the United States at the time that this report was compiled.

Avian Influenza in Poultry:

H5N1 (NIGERIA): 16 Feb 2016 23 more outbreaks of highly pathogenic avian influenza have been reported in Nigeria. Read More: <http://www.promedmail.org/post/4026033>

H5N1 (BANGLADESH): 16 Feb 2016 Highly pathogenic avian influenza, Bangladesh. Read More: <http://www.promedmail.org/post/4025716>

H5N2 (FRANCE): 15 Feb 2016 Highly pathogenic avian influenza, France. Read More: <http://www.promedmail.org/post/4023470>

NATIONAL DISEASE REPORTS

E COLI (CALIFORNIA): 13 Feb 2016 State officials added 2 more people to the list of patients in an E. coli outbreak in California linked to raw milk from Organic Pastures Dairy Co., but the dairy operator says the state's data is "garbage." Read More: <http://www.promedmail.org/post/4018874>

INTERNATIONAL DISEASE REPORTS

YELLOW FEVER (ANGOLA): 19 Feb 2016 The head of the Department of Public Health and Epidemic Control, Telma Diogo, announced on Wed 17 Feb 2016, that 8 deaths have occurred among 41 suspected yellow fever cases registered from January 2016 to date in Huila province. These data were presented in a meeting between health technicians and the Huila vice governor for the political and social sector, Maria Joao Chipalavela, to evaluate the proposed contingency plan for control of the disease. Read More: <http://www.promedmail.org/post/4033812>

CRIMEAN-CONGO HEMORRHAGIC FEVER (INDIA): 13 Feb 2016 A 40-year-old man from Gondal taluka's Shivrajgad village has posthumously tested positive for Crimean-Congo hemorrhagic fever (CCHF), commonly known as Congo fever. Read More: <http://www.promedmail.org/post/4018938>

LASSA FEVER (NIGERIA): 12 Feb 2016 Lassa fever has spread to 20 states and killed 108 people, the Nigerian Federal Government confirmed yesterday. A deadlier outbreak of the disease is possible as weather becomes hotter in coming weeks in most parts of the country, the government said. Minister of Health, Prof. Isaac Adewole, made the disclosures in Abuja, while briefing journalists on the state of Lassa fever. Read More: <http://www.promedmail.org/post/4017250>

OTHER RESOURCES AND ARTICLES OF INTEREST

More information concerning Public Health and Emergency Preparedness can be found at the Office of Preparedness and Response website: <http://preparedness.dhmm.maryland.gov/> or follow us on Facebook at www.facebook.com/MarylandOPR.

More data and information on influenza can be found on the DHMH website: <http://phpa.dhmm.maryland.gov/influenza/fluwatch/Pages/Home.aspx>

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
